IN THE CLAIMS:

 $\mbox{1.} \qquad \mbox{(Currently amended)} \quad \mbox{An ester F of } \frac{\mbox{the}}{\mbox{tormula Ib}}$

or

Ib

where wherein EO is O-CH2-CH2-,

PO is independently at each instance O-CH2-CH(CH3) or O-CH(CH3)-CH2-,

n1 + n2 + n3 is 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, or 60, m1 + m2 + m3 is 4, 5, 6, 7, 8, 9, 10, 11, 12, or 13,

R1, R2, and R3 are independently H or CH3.

2. (Cancelled)

- 3. (Currently amended) An The ester F as per either of claims claim 1 and 2, wherein n1, n2, and n3 are independently 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, or 20.
- 4. (Currently amended) An The ester F as per either of claims claim 1 to 3, wherein m1, m2, and m3 are independently 1, 2, 3, 4, or 5.
- 5. (Currently amended) An The ester F as $\frac{1}{1}$ per either of $\frac{1}{1}$ claim 1 to 4, wherein m1 + m2 + m3 is 5 or 10.
- 6. (Currently amended) An The ester F as per either of claims claim 1 to 5, wherein n1 + n2 + n3 is 30 or 50.
- 7. (Currently amended) An The ester F as $\frac{1}{1}$ per either of claims $\frac{1}{1}$ to $\frac{1}{1}$ wherein R1, R2, and R3 are identical and preferably H.

8. (Currently amended) A process for preparing an ester F as per any of claims claim 1 to 7 of from an alkoxylated trimethylolpropane of the formula IIb or IIc

H (PO)
$$m_3$$
 (EO) n_3 (EO) n_1 (PO) m_1 H

IIb

H (EO)
$$n_3$$
 (PO) m_3 (EO) m_1 (EO) m_1 (EO) m_2 (EO) m_2 H

IIc

- a) reacting alkoxylated trimethylolpropane IIb or IIc with (meth)acrylic acid in the presence of at least one esterification catalyst C and of, at least one polymerization inhibitor D, and optionally also of a water-azeotroping solvent E to form an ester F,
- b) optionally removing from the reaction mixture some or all of the water formed in a), during and/or after a),
- $\label{eq:formula} \mbox{f)} \quad \mbox{optionally neutralizing the reaction} \\ \mbox{mixture,} \\$

- h) when a solvent E $\frac{is}{was}$ used, optionally removing this the solvent E by distillation, and/or
- i) stripping the reaction mixture with a gas which is inert under the reaction conditions.
- 9. (Currently amended) A $\underline{\text{The}}$ process as elaimed in of claim 8_{7} wherein

the \underline{a} molar excess of (meth)acrylic acid to alkoxylated trimethylolpropane is at least 3.15:1, and

the optionally neutralized (meth)acrylic acid present in the reaction mixture after the last <u>process</u> step substantially remains in the reaction mixture.

10. (Currently amended) A process for preparing an ester F of alkoxylated trimethylolpropane of the formula IIa

H
$$(AO) p_3$$
 O $(AO) p_1$ H
$$(AO) p_2$$
H
IIa

 $\frac{\text{where}}{\text{wherein}}$ AO is for each AO independently EO, PO, and BO,

where EO is O-CH2-CH2-,

PO is independently at each instance O-CH2-CH(CH3)- or O-CH(CH3)-CH2-,

BO is independently at each instance O-CH2-CH(CH2-CH3) - or O-CH(CH2-CH3)-CH2-,

p1 + p2 + p3 is 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, or 75,

 $\ensuremath{\mbox{\sc with}}$ and (meth)acrylic acid, comprising the steps of

- a) reacting alkoxylated trimethylolpropane $\overline{\text{IIa}}$ with (meth)acrylic acid in the presence of at least one esterification catalyst C, and of at least one polymerization inhibitor D, and optionally also of a water-azeotroping solvent E to form an ester F,
- b) optionally removing from the reaction mixture some or all of the water formed in a), during and/or after a),

- f) optionally neutralizing the reaction mixture,
- h) when a solvent E $\frac{is}{is}$ used, optionally removing this the solvent E by distillation, and/or
- i) stripping the reaction mixture with a gas which is inert under the reaction conditions,
 wherein

the <u>a</u> molar excess of (meth)acrylic acid to alkoxylated trimethylolpropane is at least 7.5:1, and the optionally neutralized (meth)acrylic acid present in the reaction mixture after the last <u>process</u> step substantially remains in the reaction mixture.

- 11. (Currently amended) A The process as claimed in any of claims claim 8 to 10, wherein the (meth)acrylic acid is not more than 75% by weight removed from the reaction mixture obtained after the process last step, which reaction mixture contains the ester F.
- 12. (Currently amended) A The process as claimed in any of claims claim 8 to 11, wherein the reaction mixture obtained after the process last step, which contains the ester F, has a DIN EN 3682 acid number of at least 25 mg of KOH/g.
- 13. (Currently amended) A The process as claimed in any of claims claim 8 to 12, wherein the reaction mixture obtained after the process last step, which contains the ester F, has a (meth)acrylic acid content of at least 0.5% by weight.

- 14. (Currently amended) A The process as claimed in any of claims claim 8 to 13, wherein the molar ratio of (meth)acrylic acid to alkoxylated trimethylolpropane in reaction step a) is at least 15:1.
- 15. (Currently amended) A process for preparing a crosslinked hydrogel, comprising the steps of
- k) polymerizing an ester F as per any of elaims claim 1 to 7 or 10, with (meth)acrylic acid, with and an optionally optional additional monoethylenically unsaturated compounds compound N and optionally also at least one further copolymerizable hydrophilic monomer M, in the presence of at least one free-radical initiator K and optionally of at least one grating base L,
- $\label{eq:local_post_crosslinking} 1) \quad \text{optionally postcrosslinking the reaction} \\ \text{mixture obtained from } k) \text{,}$
- $$\mbox{m}\mbox{)}$$ drying the reaction mixture obtained from k) or 1), and
- n) optionally grinding and/or sieving the reaction mixture obtained from k), l), or m).

- 16. (Currently amended) A The process for preparing a crosslinked hydrogel, comprising steps a) to i) as per any of claims claim 8 to 14 and additionally
- k) polymerizing the reaction mixture from one of stages steps a) to i) if performed, with optionally an optional additional monoethylenically unsaturated compounds compound N and optionally also at least one further copolymerizable hydrophilic monomer M in the presence of at least one free-radical initiator K and optionally of at least one grafting base L,
- 1) optionally postcrosslinking the reaction \dot{m} mixture obtained from k),
- m) drying the reaction mixture obtained from k) or l), and
- (n) optionally grinding and/or sieving the reaction mixture obtained from k), l), or m).
- 17. (Currently amended) Crosslinked \underline{A} crosslinked hydrogel obtainable prepared according to a the process as per either of claims claim 15 and 16.
- 18. (Currently amended) Crosslinked A crosslinked hydrogel containing at least one hydrophilic monomer M in copolymerized polymerized form crosslinked with an ester F as per any of claims claim 1 to 7 or 10.

19. (Currently amended) Crosslinked A crosslinked hydrogel containing at least one hydrophilic monomer M in copolymerized polymerized form crosslinked with a reaction mixture which contains an ester F and is obtainable prepared according to a the process of claims claim 8 to 14.

20. (Cancelled)

21. (Currently amended) A composition $\frac{1}{2}$ $\frac{1}{2$

from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ of $\frac{1}{100}$ and $\frac{1}{100}$ and $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of at least one ester F $\frac{1}{100}$ and $\frac{1}{100}$ are from 0.1% to 40% by weight of 0.1% by weight of 0.1% by weight

0.5-99.9% by weight of at least one hydrophilic monomer M,

0-10% by weight of at least one esterification catalyst C,

0-5% by weight of at least one polymerization inhibitor D, and

0-10% by weight of a solvent E,

with the proviso that the sum total is always 100% by weight.

22. (Currently amended) A The composition of matter as per claim 21, further comprising a diluent G ad 100% by weight.

- 23. (Currently amended) Crosslinked A crosslinked hydrogel obtainable prepared from a composition of matter as per claim 21 or 22 and additionally
- 1) optionally postcrosslinking the reaction
 mixture obtained, postcrosslinked
- m) drying the reaction mixture obtained directly or from 1), and
- n)—optionally grinding and/or sieving the reaction mixture obtained directly or from 1) or m).
 - 24. (Cancelled)
- 25. (Currently amended) Crosslinked A crosslinked hydrogel as per any of claims 17, claim 18, 19 or 23 having a residual crosslinker content of less than 10 ppm, preferably less than 8 ppm, and more preferably less than 5 ppm.
 - 26. (Cancelled)
- 27. (New) The ester F of claim 1 wherein R1, R2, and R3 are H.
- 28. (New) The process of claim 10 wherein the (meth)acrylic acid is not more than 75% by weight removed from the reaction mixture obtained after the process last step, which reaction mixture contains the ester F.

- 29. (New) The process of claim 10 wherein the reaction mixture obtained after the last process step, which contains the ester F, has a DIN EN 3682 acid number of at least 25 mg of KOH/g.
- 30. (New) The process of claim 10 wherein the reaction mixture obtained after the last process step, which contains the ester F, has a (meth)acrylic acid content of at least 0.5% by weight.
- 31. (New) The process of claim 10 wherein the molar ratio of (meth) acrylic acid to alkoxylated trimethylolpropane in step a) is at least 15:1.
- 32. (New) An article comprising a crosslinked hydrogel of claim 18.
- 33. (New) The article of claim 32 selected from the group consisting of a hygiene article, a packaging material, and a nonwoven.
- 34. (New) The crosslinked hydrogel of claim 25 having a residual crosslinked content of less than 5 ppm.

- 35. (New) A process for preparing a crosslinked hydrogel, comprising the steps of
- k) polymerizing an ester F of claim 10 with (meth)acrylic acid and an optional additional monoethylenically unsaturated compound N and optionally at least one further copolymerizable hydrophilic monomer M, in the presence of at least one free-radical initiator K and optionally of at least one grating base L,
- $\label{eq:constraints} \mbox{1)} \quad \mbox{optionally postcrosslinking the reaction} \\ \mbox{mixture obtained from } \mbox{k),}$
- m) drying the reaction mixture obtained from k) or l), and
- n) optionally grinding and/or sieving the reaction mixture obtained from k), l), or m).
